EXAMINER'S AMENDMENT

- 1. In response to application filed 06/26/2001. The application has been reviewed.

 Claims 1-30 are presented for examination. The examination cited are as stated below.
- 2. Claims 1-30 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: regarding independent claims 1, 9, 15 and 22, they are analyzed in light of specification and found, claims 1 and 22 recited structures of a protocol processing system, which are clearly illustrated in fig. 1 and 2 and disclosed in detailed specification pages 3-9. Claims 9 and 15 recited the method and computer program for operating the system in claim 1 and 22. The prior arts of record, singly or in combinations failed to teach the inventions as claimed, i.e., failed to teach, inter alia, a protocol processor comprising of a protocol terminator, which controlled, communicated and stored a number of events. The terminator coupled to a frame buffer that stored data to be processed, and at least oneevent queues that queuing the events associated with the data. In addition, the system further included a protocol-processing agent coupled between the buffer and the terminator, which enabled the terminator to transport the stored events from the queue to the agent, in order to process protocol of the data in the buffer and the event in the queue in accordance with protocol processing agent specification. The prior arts of record failed to teach such conceptual structure and operational method and program, as recited in claims, 9 and 15.
- 4. Claims 2-8, 10-14, 16-21 and 23-30 are dependent of claims 1, 9, 15 and 22; they further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.
